Untuk tabel log digunakan untuk mencatat atau menyimpan event yang terjadi pada tabel clubs jika ada kolom yang dihapus atau ditambahkan ke dalam tabel, berikut query nya :

```
CREATE TABLE `logs` (

```
`Time` timestamp NOT NULL DEFAULT current_timestamp() ON UPDATE

```

```
INSERT INTO `logs` (`id`, `club_id`, `event`, `Time`) VALUES

(5, 17, 'DELETED', '2020-12-17 12:44:38');
```

```

ALTER TABLE `logs`  
  ADD PRIMARY KEY (`id`);
```

```
ALTER TABLE `logs`  
  MODIFY `id` int(11) NOT NULL AUTO_INCREMENT, AUTO_INCREMENT=6;

Untuk Trigger dibawah ini, dibuat dan terletak pada tabel clubs. Jadi untuk setiap event delete atau insert, semua akan tercatat secara otomatis ke dalam tabel logs yang menunjukkan waktu dan event tersebut.
